

$$= \frac{x \begin{array}{|c|} \hline 0 \\ \hline 9 \\ \hline \end{array}}{0} \quad \times$$

The diagram illustrates a division operation that is mathematically invalid. It features a red equals sign on the left, followed by a fraction. The numerator of the fraction is 'x' multiplied by a vertical stack of two digits, '0' and '9', which are enclosed in a red rectangular box. A horizontal line separates the numerator from the denominator, which is a single '0'. To the right of the fraction, there is a large red 'X' indicating that the operation is incorrect or undefined.
